

# Halkitis Brothers, (HB), Group of Companies

## Quality Safety and Environment Policy

Founded in 1960, as a civil construction company, Halkitis Brothers (HB) is a locally owned and operated business which has prospered with the Northern Territory.

Our commitment to providing quality construction materials has seen our activities steadily grown, employing over 100 local staff. This success has allowed us to expand operations to include commercial and residential construction, manufacturing, tourism, mining, transport and maintenance.

*"Our vision is to be the leading producer of construction materials in the Northern Territory and to continually expand and diversify our services to meet industry and customer demands."*

**Our policy is to provide quality service, a safe and healthy workplace and maintain the integrity of the natural environment.**

In order to achieve this we:

- Incorporate quality, health, safety and the environment as a fundamental part of our business.
- Have business objectives which will:
  - continually improve the effectiveness of the quality management system;
  - work towards an injury free working environment with no environmental harm;
  - Identify and manage all quality, health, safety, and environmental hazards and risks associated with our business.
- Actively promote a positive culture of quality, health, safety, and environmental awareness through communication, consultation, continuous improvement, openness and ownership.
- Meet our customers' needs and involve everyone connected with our business.
- Comply with all relevant legislation, standards and codes of practice.
- Regularly review all quality, health safety and environment business objectives; and the suitability of this policy.
